

Ranking the schools

Important notes to the rankings

In this table, schools are ranked (on the left side of the page) in descending order (from 1 to 279) according to their academic performance as measured by the *Overall rating out of 10* (shown on the right side of the table) for the school year 2004/2005. Each school's five-year average ranking and *Overall rating out of 10* are also listed. The higher the overall rating (out of 10), the higher the rank awarded to the school. Where schools tied in the overall rating, they were awarded the same rank. Where fewer than five years of data were available, "n/a" appears in the table.

Not all the province's secondary schools are included in the tables or the ranking. Excluded are schools at which fewer than 15 regular day students were enrolled in grade 12 and schools that did not generate a sufficiently large set of student data to enable the calculation of an *Overall rating out of 10*. Also excluded from the ratings and rankings are centres for adult education and continuing education; schools that cater largely to non-resident foreign students; and certain alternative schools that do not offer a full program of courses.

The exclusion of a school from the *Report Card* should in no way be construed as a judgement of the school's effectiveness.

Rank		School name	City	Overall rating

Appendix 1: Calculating the Overall rating out of 10

The *Overall rating out of 10* is intended to answer the question, “In general, how is the school doing, academically?” The following is a simplified description of the procedure used to convert the raw indicator data into the *Overall rating out of 10*.

- 1 The *School vs exam mark difference* for each course and the English 12 and Mathematics 12 *Gender gap* indicators were calculated using the raw data.

- 2 Course by course, all the results were then converted into standardized or “Z” scores by solving the equation

$$Z = (X - \mu) / \sigma$$

where X is the individual school’s result, μ is the mean of the all-schools distribution of results, and σ is the standard deviation of the same all-schools distribution.

- 3 With the exception of the *Gender gap* indicators (these use the results from a single course), the course-by-course standardized data were then aggregated to produce weighted average indicator values. The weighting used was the number of examinations written in each course at the school relative to the total number of examinations written at the school.

- 4 These weighted average results were then re-standardized.

- 5 The eight standardized indicator results were then combined to produce a weighted average summary standardized score for the school. The weightings used in this calculation were *Average exam mark*—20%, *Percentage of exams failed*—20%, *School vs exam mark difference*—10%, *English 12 gender gap*—5%, *Math 12 gender gap*—5%, *Exams taken per student*—20%, *Graduation rate*—10%, and *Delayed advancement rate*—10%. For schools for which there were no gender-gap results because only boys or girls were enrolled, the *School vs exam mark difference* was weighted at 20%. Where no *Composite dropout rate* could be calculated, the *Graduation rate* was weighted at 20%.

- 6 This summary standardized score was then standardized.

(Note: In this edition of the *Report Card*, the *Sports participation rate* indicator was not used in the calculation of the *Overall rating*. It will contribute to the *Overall rating* in future editions.)

This standardized score was converted into an overall rating between 0 and 10 as follows:

- 7 The maximum and minimum standardized scores were set at 2.2 and -3.29 respectively. Scores equal to, or

greater than 2.2 receive the highest overall rating of 10. This cut-off was chosen because it allows more than one school in a given year to be awarded 10 out of 10. Scores of equal to, or less than, -3.29 receive the lowest overall rating of 0. Schools with scores below -3.29 are likely to be outliers—a statistical term used to denote members of a population that appear to have characteristics substantially different from the rest of the population. We chose, therefore, to set the minimum score so as to disregard such extreme differences.

- 8 The resulting standardized scores were converted into *Overall ratings* according to the formula:

$$OR = \mu + (\sigma * \text{StanScore}),$$

where *OR* is the resulting *Overall rating*, μ is the average calculated according to the formula:

$$\mu = (OR_{\min} - 10 (Z_{\min} / Z_{\max})) / (1 - (Z_{\min} / Z_{\max}))$$

where σ is the standard deviation calculated according to the formula:

$$\sigma = (10 - \mu) / Z_{\max}$$

and StanScore is the standardized score calculated in (6) above and adjusted as required for minimum and maximum values as noted in (7) above. As noted in (7) above, OR_{\min} equals zero, Z_{\min} equals -3.29; and Z_{\max} equals 2.2.

- 9 Finally, the derived *Overall rating* is rounded to one decimal place to reflect the significant number of places of the decimal in the original raw data.

Note that the *Overall rating out of 10*, based as it is on standardized scores, is a relative rating. That is, in order for a school to show improvement in its overall rating, it must improve more than the average. If it improves, but at a rate less than the average, it will show a decline in its rating.

Appendix 2: Limitations of data provided by BC School Sports

The data used to calculate the *Sports Participation rate* was provided by BC School Sports (BCSS).

1. Data presented only represents the following 18 Sport Commissions that BCSS Sanctions:

Aquatics,	Football—Boys,	Soccer—Girls,
Badminton,	Golf,	Tennis,
Basketball—Boys,	Gymnastics,	Track and Field/Cross Country,
Basketball – Girls,	Mountain Biking,	Volleyball—Boys,
Curling,	Skiing and Snowboarding,	Volleyball—Girls,
Field Hockey—Girls,	Soccer—Boys,	Wrestling.

2. There are additional, high-profile, sports not sanctioned by BCSS in which a large number of student athletes participate at schools across the province. Those sports include hockey, lacrosse, rugby (girls), rowing, and ultimate. Data presented only represent those students actually registered on the school team and does not provide statistics on those students who may participate in additional non-sanctioned teams at a school.

3. Data presented only represent the 400 schools that were members of BCSS during 2004/2005. No elementary school is a member and some middle schools have chosen not to be members.

4. Some schools may not have registered their grades 7, 8, or 9 teams even though it is a requirement of BCSS.

5. Data is for the school year 2004/2005.
